BLOCKCHAIN OVERVIEW

All components related to Business Ticker blockchain platform will run on the Ethereum network.

There are two co-dependent facilitators of all interactions on the blockchain detailed below:

Smart Contracts and the Business Ticker token.

Ethereum is different from Bitcoin because it allows you to create smart contracts that can be described as highly programmable digital money. Contrary to many other cryptocurrencies, Ethereum is not only a network for the exchange of monetary value but a network to run contracts based on Ethereum.

These contracts can be used safely to perform a large number of operations: electoral systems, registration of domain names, financial markets, crowdfunding platforms, intellectual property, etc.

Business Ticker reserves the right to use one or more blockchains within its project. This will allow us to be totally decentralized without depending on a single technology.

ABOUT Business Ticker (BSTC) TOKEN

Business Ticker token is a store of value built on the Ethereum blockchain with a unique deflationary features; which will be used to bring about it users records around the globe, to store series of data's and to keep intensive history of all blockchain technology in the past and also in making.

DEFLATIONARY

Whenever BSTC is transferred, 1% of the total amount will automatically burned due to its deflationary features.

PROBLEM STATEMENT

Up till date, cryptocurrency has yet to gain mainstream adoption. The barriers to mass market adoption will be eliminated when become embedded into everyday commerce.

One of the major problem of blockchain technology is fast and low fee or zero translation, the fact that it literally easier to commemorate on the issue of transaction has become more tense these days.

Another issue is building intensive career opportunity on blockchain technology, I believe with the level of people coming in, to adapt digital asset a means of update and records should be kept fast.

It is difficult to find a dapp app for digital asset downloading and it has been a serious problem for decades.

A PROPOSED SOLUTION

After all said and done, Business Ticker (BSTC) is set to bring about to communicate in a short terms of blocks; is the reading of accurate data.

BSTC token is set to bring about it users records around the globe and also to store series of data's to keep and intensive history of all blockchain technology in the past and also in making.

The means of assessing all the above listed futures will be leverage on our token (Business Ticker) and also to make sure it is well protected with a secure web accumulating history.

A description of the token commercialization (product interaction with economy and technical provisions of commercialization):

Our major focus is how to create a fast means of transaction with or without Fee

TRADING

A monochromatic dapp system of sending and dating of information.

The use of Business Ticker (BSTC) token in accessing current and past details of existing project.

It will also serve as terms of payment among members.

A product of dapp monopoly system...

BSTC will help new users break out of the closedloop fiefdoms and encourage innovators to develop innovative blockchain services, including credit.

BSTC tokens' much lower transaction fees eliminate overdraft fees because over-drafting funds on the blockchain is impossible.

BSTC token will allow citizens to leverage a peerto-peer banking economy where everyone has complete control of his/her assets in hand.
